

**Patented technologies
for water treatment
and saving**

Catalogue 2023

The background of the entire page is a close-up, high-resolution image of water ripples. The ripples are concentric and flow from the center towards the edges, creating a sense of movement and depth. The colors range from a deep, dark blue at the bottom to a lighter, almost white blue at the top, where the light reflects off the water's surface.

WATER **THE BASIC SOURCE** **OF LIFE**

Water is the basic source of life. Even if it is not traded on the stock exchange, we probably do not exaggerate when we say that water is the most precious commodity. Our goal is to protect this precious fluid and bring it to our customers in the best quality.

Let the Water Flow

Ondřej Sochor

Partner – CEO
Swiss Aqua Technologies AG

Water together with air, resp. Earth's atmosphere, form the basic conditions for the existence of life on Earth. Most of the Earth's surface (71%) is covered by the salt water of the seas and oceans, which make up 97% of the entire water on our planet.

It might seem that we already know everything about water, but in recent decades a number of revolutionary findings have emerged that completely change the perception of water from a chemical formula to a rather living organism. These are the results of research by Professor Masaru Emoto (water perceives emotions), Gerald H. Pollack (4th state of water), Viktor Schaubberger (water is a living organism), M. V. Kurik (water energy) or L. Montagnier (water has memory).

Our technologies use a tiny part of this new knowledge and we are constantly working to get to know water better and better, and we are implementing this new knowledge into future generations of our products. If our catalog or our products inspire you to read or view something about water on the Internet, then our work made sense.

About SAT

Swiss Aqua Technologies AG (SAT) is a company based in Cham, Switzerland. It consists of a team of engineers and scientists involved in the nearly two decades of product development in order to improve water quality, to save water with an emphasis on health effects and environmental impacts. The results are revolutionary solutions in a unique systems like IPS – Ion Polarization System, OFS – Optim Flush System or WCS – Water Care System.

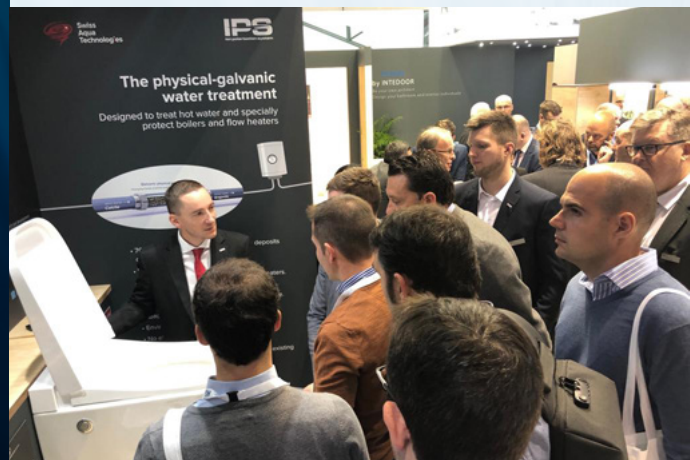

IPS products are already being sold to many countries all over the world, like USA, Mexico, Thailand, China, Israel and many others.

Our logistics partner for the expedition to Europe, America and Africa is SIKO. With 30,000 m² of storage space, 100,000 pallet places and 50 trucks loaded / unloaded every day, SIKO is the perfect partner for fast and reliable shipments worldwide.

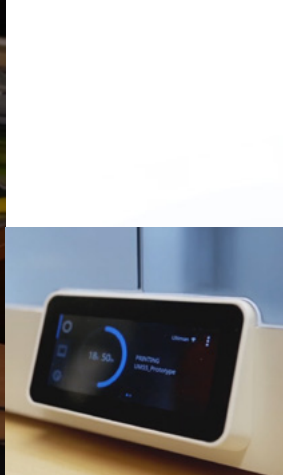

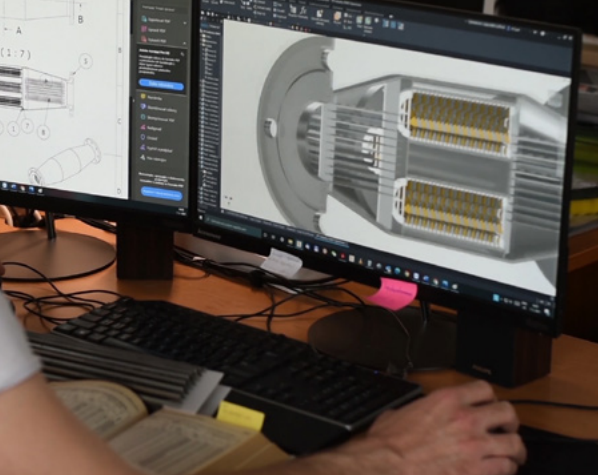

Research and development

- Own team of engineers and scientists
- International cooperation
- Technical support department

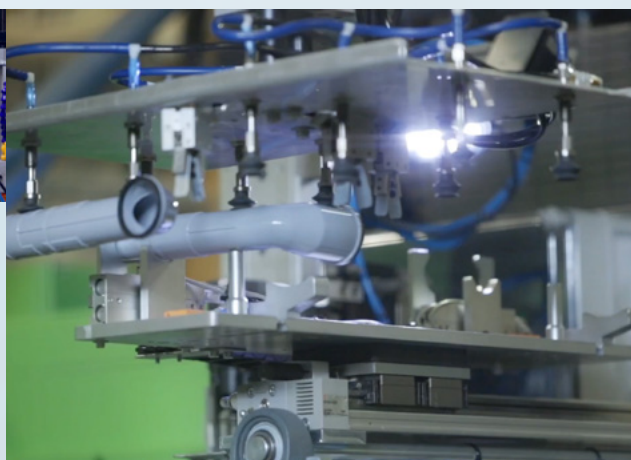

We cooperate with the following companies on the development and production of SAT brand products:

Production

- International certification of production
- High level of automation
- Top quality control

Patented products

- Toilets and flushing systems
- Physical water treatment systems
- Multifunctional shower systems

Modern storage space

- Storage space 30 000 m²
- 100 000 pallet places
- 50 trucks every day

LIXIL

VitrA

Technologies

Our solutions bring the required quality of drinking and utility water through its physical adjustment and thus to maximize the use of its positive properties.

„Water is not just H₂O, but a living organism with its own laws that people must respect. It hides similar secrets as the blood in the human body, it fulfills functions in nature that justify talking about it as the blood of the Earth. It is a living substance that is born and continues to develop and, under normal circumstances, passes into higher forms of energy. We should allow it to move in its natural environment and to develop in it.“

– Viktor Schauberger

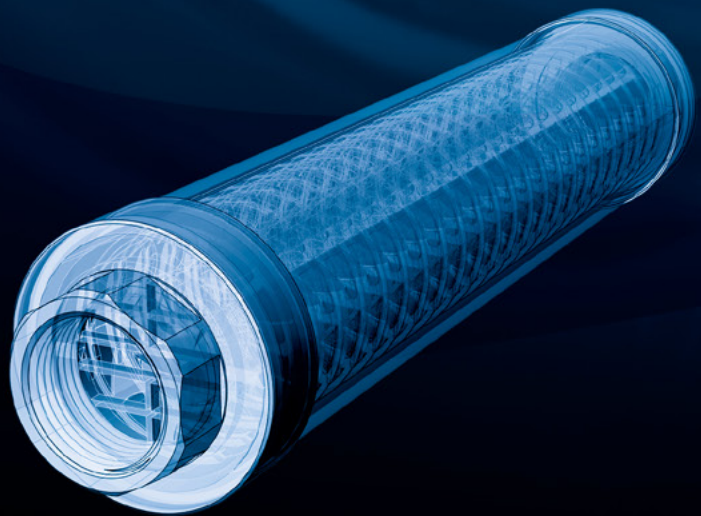

Let the Water Flow

IonPolarization
System

Water Improvement

IPS is an ecological way of water treatment using natural (physical) laws. The device operates on the principle of “wet galvanic cell”. The use of IPS is appropriate and efficient where the water shows medium, high to very high hardness.

OptimFlush
System

Water Saving

OFS is unique system how to flush toilet using pressure which is taken from the pipes. The pressured air with water is stored in the tanks inside toilet, ready to be released when needed. The result is very efficient and silent flush, that can never be reached by using gravitation flushing.

WaterCare
System

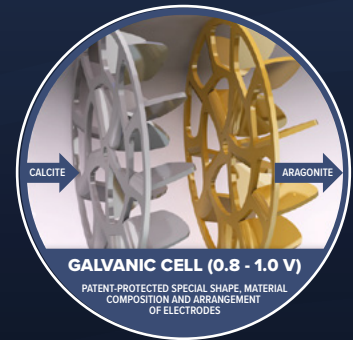

Water Care

WCS products use the power of the water to spin while flowing through turbine. Our products transform this energy in order to rotate elements on hand shower – that can help you to do your pedicure, peeling or massage in a very gentle way. No external energy is needed, just let the water flow.

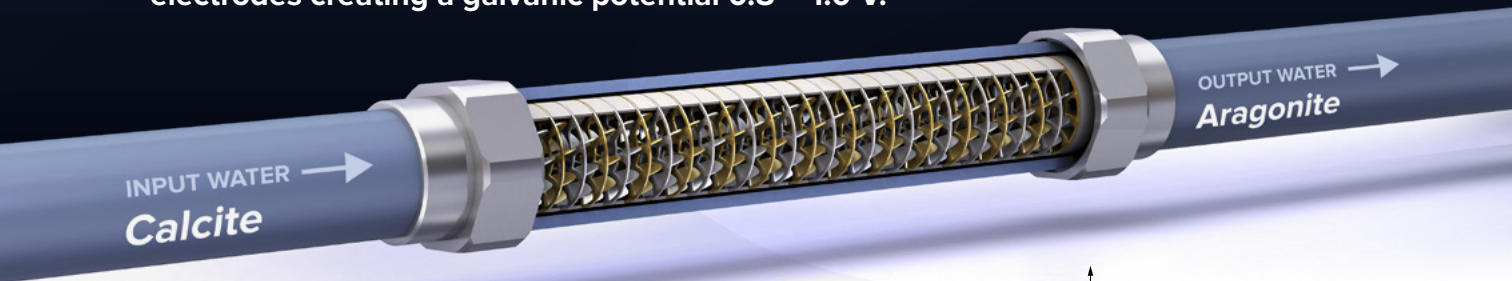

Ion Polarization System

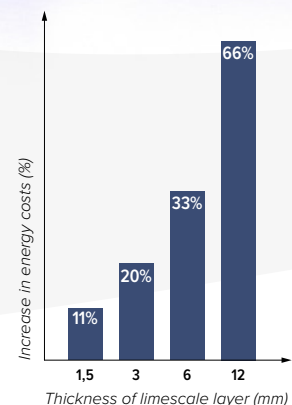

The physical-galvanic
water treatment

A new revolutionary system for preventing limescale and removing existing limescale from water heaters, pipes, mixers, showers and all equipment through which water flows with certified efficiency up to 76%. IPS use energy of spinning water and electrodes creating a galvanic potential 0.8 – 1.0 V.

- Changes hard calcite to soft aragonite.
- Reduces the need to de-scale tankless heaters, mixers, showers.
- Doesn't restrict household water pressure.
- Connects directly to copper, CPVC or PVC pipe.
- Adapts easily for PEX and other pipe types.
- Environmentally friendly and chemical-free.
- No electricity required.
- Easy-to-install and maintenance-free.
- Extends the life and efficiency of new and existing water heaters, mixers, showers, etc.
- Certified for long-term contact with drinking water.

Ion Polarization System

effective protection against corrosion and scale formation

Ion Polarization System (IPS) is designed for the physical-galvanic water treatment for households, public buildings and industrial plants. IPS is suitable for new pipelines for prevention, but also for the old ones, where it gradually removes existing deposits.

How the IPS works

IPS effectively prevents the formation of solid sediments and corrosion in cold and hot water appliances. IPS is a flow-through body with inside placed turbine-shaped electrodes of two different electrically conductive materials. The electrode design is patent-protected (TGP® – Turbulent Galvanic Polarization) and generates a swirling water flow, causing a change in the structure of the minerals.

Physical propensity at 50.0 µm level

Changes in calcium carbonate crystal when using IPS (increased to 50.0 µm). Water marked 0 is without the use of IPS. Water 1, 2 and 3 flowed through the IPS. The photos show changes in the crystal structure.

IPS KalyxX

your best defence
against limescale

IPS Kalyxx is a flow-through body with inlet and outlet ports. Inside are placed turbine-shaped electrodes (not magnets) of two different electrically conductive materials.

IPS KalyxX is suited for both traditional tank and tankless water heaters in areas with moderate to severe hard water. It's an inexpensive way to protect their investment, easy to install, and a great value. IPS KalyxX is designed to fit directly on the male NPT/G inlet of any residential water heater. Without a IPS KalyxX installed, tankless heaters must be flushed and cleaned with chemicals every one to three years to function properly.

IPS KalyxX

RED LINE

Reduction of limescale formation
with efficiency up to 76%

**IPS KalyxX protects your home from limescale buildup.
It requires no power supply, batteries, chemicals or filters.**

IPS KalyxX uses a patented Turbulent Galvanic Polarization (TGP®) electrode to disrupt the formation of limescale crystals on water heaters, showers, thermostatic cartridges, taps, etc. In side-by-side comparison testing, IPS KalyxX was four times more effective than the leading electronic or magnetic scale devices. IPS KalyxX is easy to install and maintenance free.

- **Connection:** Female NPT/G x Female NPT/G
- **Patented Discs Composition**
- **Maximum Flowrate:** up to 7 m³/h*
- **Material:** Stainless Steel
- **Pipe Type:** Copper, CPVC, PVC, PEX
- **Maximum Pressure Drops:** 43 Pa – 692 Pa*
- **Operating Temperature (inlet):** 0 °C to 95 °C
(Optimal temperature for maximum efficiency Min/Max (inlet): 0 °C to 60 °C)

IPS KalyxX RedLine

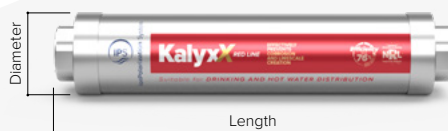

- Reduces creation of limescale on water supply elements (pipework, valves, taps, shower heads, waterheating coils of home appliances) – efficiency of 76%.
- New Patented technology TGP® – Turbulent Galvanic Polarisation – no chemicals, no external energy.
- Suitable for cold (drinking) and hot water.
- NRL Certificate for direct permanent contact with drinking water.
- Health safety product – each part of IPS is made from material suitable for contact with drinking water.
- Safe product – Verified Hydraulic Properties.
- TSU test report about Pressure drop, Pressure resistance and Strength.
- Durable body (Stainless steel 1.4301) and internal parts – 2 years warranty, works at least 10 year without any maintenance.

IPS KalyxX INDUSTRY

Reduction of limescale formation
for use in systems with higher water flow

**IPS KalyxX protects your home from limescale buildup.
It requires no power supply, batteries, chemicals or filters.**

IPS KalyxX uses a patented Turbulent Galvanic Polarization (TGP®) electrode to disrupt the formation of limescale crystals on water heaters, showers, thermostatic cartridges, taps, etc. In side-by-side comparison testing, IPS KalyxX was four times more effective than the leading electronic or magnetic scale devices. IPS KalyxX is easy to install and maintenance free.

PATENT
PROTECTED

IPS KalyxX Industry

The use of IPS Industry is effective and suitable in any running water plant. Washing lines, restaurants, canteens, bakeries, laundries, hairdressers, dry cleaners, swimming pools, dairies, breweries, distilleries, gardening, irrigation systems and much more. It also works reliably in heat exchangers, water systems, boilers, condensers, generators, heating systems, compressor rooms, refrigeration and air conditioning equipment.

- Solution for apartment buildings and buildings with higher hourly flow.
- Suitable for direct water-to-water heat pump circuit with high output, for stabilization of wastewater purifier at values guaranteed by the producer.
- Installation at the entrance to the building.
- Cold water supply pipes for central heating at transfer stations and boiler rooms.
- Prevent clogging of plate heat exchangers and stabilize specific heat demand for hot water.
- Stabilization of point corrosion of storage heaters.

IPS WashBall

**Effectively prevents corrosion
and limescale creation**

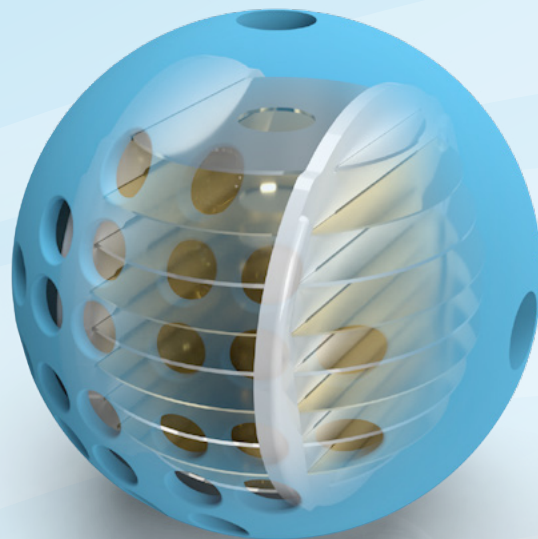

- Protects appliances from limescale.
- Easy to use, no chemical softeners.
- No maintenance required.

- **LIMESCALE PROTECTION**
- **WATER SAVING**
- **HIGHER WASHING EFFICIENCY**
- **MONEY SAVING**
- **ENVIRONMENT FRIENDLY**

For using in:

- **WASHING MACHINES**
- **DISHWASHERS**
- **TOILET TANKS**

PATENT
PROTECTED

IPS effectively prevents the formation of solid sediments and corrosion in cold and hot water appliances.

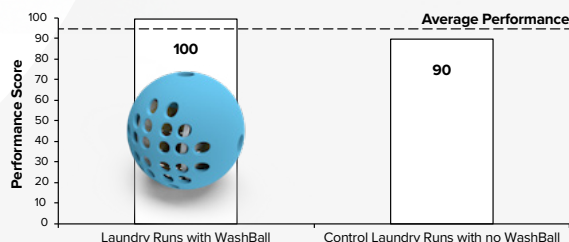

IPS WashBall is a flow-through body with inside placed turbine-shaped electrodes of two different electrically conductive materials. The electrode design is patent-protected (TGP® - Turbulent Galvanic Polarization) and generates a swirling water flow, causing a change in the structure of the minerals.

The diagram illustrates the internal structure of the Wash Ball, which is designed to clean dishes using a galvanic cell. The main view shows a cross-section of the ball, revealing a blue outer shell and a white inner structure. Inside, there are several yellow, fan-shaped components labeled "ALLUMINIUM ELECTRODE" and "BRASS ELECTRODE". A "SOFT PLASTIC COVER" is also indicated. An inset circular view provides a detailed look at the "GALVANIC CELL" components, showing "ARAGONITE" and "CALCITE" deposits on the electrodes.

It is proven with our internal tests and also by independent test (Clearview-USA) that washball has positive effects on Higher Washing Efficiency. During our test of Cotton /40 °C/60 ml washing gel we reach such a result.

Water Saving

OptimFlush System

The new revolutionary solution for toilet and flushing

- The most efficient flushing system.
- No need for a concealed cistern installation.
- Adjustable water quantity – 1,5 – 2,5 – 4 l.
- Quiet operation – low noise level of flushing.
- Higher water level – very easy to clean.
- Quick and easy installation.
- Tested for 200 000 cycles.
- CE certificated – comply with EN997.

50% less water per flush

One piece solution - tank less

No external energy

Studio S Low Profile
Studio S Toilet
with OptimFlush
System technology

PATENT
PROTECTED

OptimFlush creates a next generation of the toilet. Tank less toilet without external power supply, with extremely low water consumption fulfilling the strictest parameters of current technical standards and regulations with focus on maximum simplicity and reliability of the system.

“All In One” philosophy puts the greatest emphasis on fast and easy installation and building readiness. The top priority is the final appearance.

OptimFlush System

OptimFlush System is suitable for both types of flushing

- **syphonic**
(mainly Asia and USA)
- **washdown**
(mainly Europe and Midle East)

OFS is unique system how to flush toilet using pressure which is taken from the pipes.

The pressured air with water is stored in the tanks inside toilet, ready to be released when needed.

The result is very efficient and silent flush, that can never be reached by using gravitation flushing (used in standard toilets in Europe).

Premiere of the Studio S toilet with OptimFlush technology at the KBIS 2020 trade fair in Las Vegas (USA).

Care for Health & Beauty

2in1

The Pedicure Shower is designed for the easy, safe and fast removal of hard skin on the feet. It can be done after every bath or shower and gently removed skin is immediately and cleanly washed away.

There is no need for an external source or mechanical power. Continuous rinsing with water provides gently care and the resulting effect. Combination with shower function provides the user with a more comprehensive 2 in 1 benefit.

Double-sided use 2in1

160x70x41cm	SATVIVI160SIP
170x70x41 cm	SATVIVI170SIP
170x75x41 cm	SATVIVI17075SIP

 The water stays warm longer than in an acrylic bathtub.

 Made of recyclable material, environmentally friendly.

Enameled steel

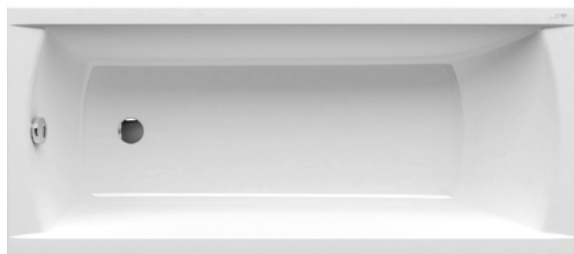

- combination of two natural substances - glass and steel
- steel is characterized by high strength and load capacity
- glass is decorated with great resistance to heat and chemical stress

-  Soundproof variants of Vivien Silent + significantly reduce the noise of the bath during the bath.
-  Sound insulation meets the strictest Swiss and German standards (SIA 181, DIN 4109 / A1).

 Prices are without legs NOHYVA

170x70x41 cm	RP1700

Recommended to combine with bathtub screens (pages 72 - 75).

Cast acrylate

SURPRISINGLY LARGE INTERIOR

- Slim hems and a greater slope of the side walls give the bathtub a large interior space for a pleasant bath.

COMFORTABLE AND SAFE SHOWERING

- The wide interior space, flat bottom and the addition of a bath screen guarantee a safe shower while standing.

THE IDEAL SOLUTION FOR A SMALLER BATHROOMS

- The width of only 70 cm saves space in the bathroom, the shape of the bathtub allows it to be supplemented with any type of bathtub screen.

Quality material - Cast acrylate is used to make bathtubs. Products made of it retain their desired shape for a long time, they do not warp or crack. They have a high-gloss and non-porous surface that is easy to clean and has antibacterial properties.

SATBEASY2233

Pre-wall installation system

Application

For mounting in front of a support wall or in to a plasterboard construction.

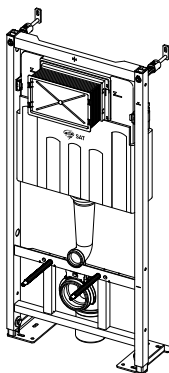

For installation of wall-hung WC pans with a connecting pitch of 180 mm or 230 mm.

For floor thickness 0–200 mm.

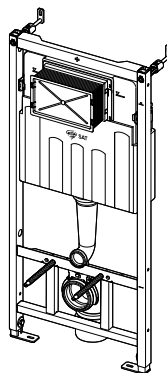

For wall-hung WC.

Features

- Dual flush independently adjustable with hygienic reserve
- Compatible with all SAT flush plates
- The construction of polystyrene insulation prevents condensation forming on the surface of the tank and dampens the vibrations from the tank into the building structure
- The frame allows the anchoring to a separate sufficiently strong plasterboard partition, in front of the bearing wall
- The service opening cover simplifies assembly and prevents the penetration of moisture and impurities
- Frame material: powder-coated metal
- Installation depth adjustable from 20–95 mm
- Suitable for installation of remote or sensor flushing
- Possibility of tilting the cistern for easy installation in wooden construction buildings or mobile cells
- The cistern is made of one piece, thus ensuring 100% impermeability
- The installed module is covered with a plasterboard panel and there is no need for any additional fixing or anchoring elements
- Adjustable anchor feet and a spring-lock system, with a range of 0–200 mm
- Dispenser for WC cistern tablets included
- Sliding rail holder for the waste connector can be set to eight positions between 0–93 mm
- Prepared for connecting a bracket with a DG 1/2" conversion for bidet seats and sprays
- Water supply from the rear/top
- Angle valve with the ability to connect to the Mepla piping system
- Maintenance work without using any tools
- Installation depth 125 mm
- Visible marks for both leveling and the centerline
- Cistern hinges made of two-component material insulate the transmission of vibrations from buildings

Bathroom accessories

The image shows three cylindrical bathroom accessories, likely soap dispensers or storage containers, arranged in a row. They are colored blue, pink, and yellow from left to right. Each cylinder has a silver-colored band around its middle and a matching colored cap with a silver-colored push-button. The text 'Bathroom accessories' is overlaid in white on the blue cylinder.
