# **WATER THE BASIC SOURCE OF LIFE**

*Water is the basic source of life. Even if it is not traded on the stock exchange, we probably do not exaggerate when we say that water is the most precious commodity. Our goal is to protect this precious fluid and bring it to our customers in the best quality.*

*Let the Water Flow*

**Ondřej Sochor**

Partner – CEO  
Swiss Aqua Technologies AG

Water together with air, resp. Earth's atmosphere, form the basic conditions for the existence of life on Earth. Most of the Earth's surface (71%) is covered by the salt water of the seas and oceans, which make up 97% of the entire water on our planet.

It might seem that we already know everything about water, but in recent decades a number of revolutionary findings have emerged that completely change the perception of water from a chemical formula to a rather living organism. These are the results of research by Professor Masaru Emoto (water perceives emotions), Gerald H. Pollack (4th state of water), Viktor Schauberger (water is a living organism), M. V. Kurik (water energy) or L. Montagnier (water has memory).

Our technologies use a tiny part of this new knowledge and we are constantly working to get to know water better and better, and we are implementing this new knowledge into future generations of our products. If our catalog or our products inspire you to read or view something about water on the Internet, then our work made sense.

## About SAT

Swiss Aqua Technologies AG (SAT) is a company based in Cham, Switzerland. It consists of a team of engineers and scientists involved in the nearly two decades of product development in order to improve water quality, to save water with an emphasis on health effects and environmental impacts. The results are revolutionary solutions in a unique systems like IPS – Ion Polarization System, OFS – Optim Flush System or WCS – Water Care System.

IPS products are already being sold to many countries all over the world, like USA, Mexico, Thailand, China, Israel and many others.

Our logistics partner for the expedition to Europe, America and Africa is SIKO. With 30,000 m<sup>2</sup> of storage space, 100,000 pallet places and 50 trucks loaded / unloaded every day, SIKO is the perfect partner for fast and reliable shipments worldwide.

### Research and development

- Own team of engineers and scientists
- International cooperation
- Technical support department

We cooperate with the following companies on the development and production of SAT brand products:

## Patented products

- Toilets and flushing systems
- Physical water treatment systems
- Multifunctional shower systems

**LIXIL**

**paffoni**

**RAVAK®**

**VitrA**

Swiss  
Aqua  
Technologies®

## Technologies

Our solutions bring the required quality of drinking and utility water through its physical adjustment and thus to maximize the use of its positive properties.

*„Water is not just H<sub>2</sub>O, but a living organism with its own laws that people must respect. It hides similar secrets as the blood in the human body, it fulfills functions in nature that justify talking about it as the blood of the Earth. It is a living substance that is born and continues to develop and, under normal circumstances, passes into higher forms of energy. We should allow it to move in its natural environment and to develop in it.“*

– Viktor Schauberger

*Let the Water Flow*

IonPolarization  
System

## Water Improvement

IPS is an ecological way of water treatment using natural (physical) laws. The device operates on the principle of “wet galvanic cell”. The use of IPS is appropriate and efficient where the water shows medium, high to very high hardness.

OptimFlush  
System

## Water Saving

OFS is unique system how to flush toilet using pressure which is taken from the pipes. The pressured air with water is stored in the tanks inside toilet, ready to be released when needed. The result is very efficient and silent flush, that can never be reached by using gravitation flushing.

WaterCare  
System

## Water Care

WCS products use the power of the water to spin while flowing through turbine. Our products transform this energy in order to rotate elements on hand shower – that can help you to do your pedicure, peeling or massage in a very gentle way. No external energy is needed, just let the water flow.

# Ion Polarization System

The physical-galvanic water treatment

A new revolutionary system for preventing limescale and removing existing limescale from water heaters, pipes, mixers, showers and all equipment through which water flows with certified efficiency up to 76%. IPS use energy of spinning water and electrodes creating a galvanic potential up to 4.5 V.

- Changes hard calcite to soft aragonite.
- Reduces the need to de-scale tankless heaters, mixers, showers.
- Doesn't restrict household water pressure.
- Connects directly to copper, CPVC or PVC pipe.
- Adapts easily for PEX and other pipe types.
- Environmentally friendly and chemical-free.
- No electricity required.
- Easy-to-install and maintenance-free.
- Extends the life and efficiency of new and existing water heaters, mixers, showers, etc.
- Certified for long-term contact with drinking water.

PATENT  
PROTECTED

# Ion Polarization System

effective protection against corrosion and scale formation

**Ion Polarization System (IPS)** is designed for the physical-galvanic water treatment for households, public buildings and industrial plants. IPS is suitable for new pipelines for prevention, but also for the old ones, where it gradually removes existing deposits.

## How the IPS works

IPS effectively prevents the formation of solid sediments and corrosion in cold and hot water appliances. IPS is a flow-through body with inside placed turbine-shaped electrodes of two different electrically conductive materials. The electrode design is patent-protected (TGP® – Turbulent Galvanic Polarization) and generates a swirling water flow, causing a change in the structure of the minerals.

## Physical propensity at 50.0 µm level

Changes in calcium carbonate crystal when using IPS (increased to 50.0 µm). Water marked 0 is without the use of IPS. Water 1, 2 and 3 flowed through the IPS. The photos show changes in the crystal structure.

## IPS efficiency comparison

# IPS KalyxX

your best defence  
against limescale

IPS Kalyxx is a flow-through body with inlet and outlet ports. Inside are placed turbine-shaped electrodes (not magnets) of two different electrically conductive materials.

IPS Kalyxx is suited for both traditional tank and tankless water heaters in areas with moderate to severe hard water. It's an inexpensive way to protect their investment, easy to install, and a great value. IPS Kalyxx is designed to fit directly on the male NPT/G inlet of any residential water heater. Without a IPS Kalyxx installed, tankless heaters must be flushed and cleaned with chemicals every one to three years to function properly.

MAGNETS  
THE MAGNETIC FIELD  
ACTS ON WATER AND  
HELPS TO CHANGE  
ITS STRUCTURE

KalyxX Active is an original vortex water treatment device that creates unique properties of water by changing its structure. It is built on our Ion Polarization System supplemented with magnets that enhance the effect of the device. The confirmed effectiveness of protection against limescale reaches 90%. The device uses energy of spinning water, electrodes create a galvanic potential up to 4.5 V.

## LIMESCALE PROTECTION

- Changes hard calcite to soft aragonite.
  - Reduces the need to de-scale tankless heaters, mixers, showers.
  - Extends the life and efficiency of new and existing water appliances and devices through which water flows.
- 
- Antibacterial effect (silver electrodes).
  - Doesn't restrict household water pressure.
  - Connects directly to copper, CPVC or PVC pipe.
  - Adapts easily for PEX and other pipe types.
  - Environmentally friendly and chemical-free.
  - No electricity required.
  - Easy-to-install and maintenance-free.
  - Certified for long-term contact with drinking water.

# LIMESCALE PROTECTION

# WATER ACTIVATION

## Water Improvement

# KalyxX Active

## WATER ACTIVATION

The change in the scale structure is only one of the effects of water treatment in the KalyxX Active device. The flow of water through the KalyxX Active changes its energy-informational field. The result is the so-called "structured" or "activated" water. KalyxX Active water activation has been confirmed by three independent laboratories:

- Slovak University of Agriculture (EU)
- Masaru Emoto's Laboratory (Japan)

### Slovak University of Agriculture

In 2021, the research team from the Slovak University of Agriculture in Nitra (Slovakia, EU) ensured several experiments with the application of activated water with the IPS system in laboratory, greenhouse and field conditions.

The measurements confirmed that the IPS device is unique and original for structuring water and creates unique properties in water. Based on the experiments with plant species, the following effects of the action of IPS were clearly confirmed:

- **Increasing the antioxidant activity (AA) of plant parts.\***
- **Improvement of the water regime in plants – increasing tolerance against drought.**
- **Increased tolerance against biotic factors – lower presence of diseases.**
- **Shortening of the growing season.**
- **An increase in the content of cannabinoids in plant parts of hemp.**

\* Changing several important biologically active components in plants (vitamins, amino acids, flavonoids, polyphenols, polyphenolic acids and many others).

*Comparison of the tested variants with activated stable water at different pressures for the germination and emergence of spring wheat (*Triticum aestivum L.*) seeds in sand after 4 days from the start of the experiment with a weight of 10 g:*

*Tap water (control sample)*

*Activated water at a pressure of 75 Pa.*

## Masaru Emoto's Laboratory

Water is one of the most indispensable substances for the life of human beings. It is not enough to take in a necessary quantity of water inside of the body, but we should take the quality of water into consideration. For instance, the district where a lot of long life people live is blessed with high quality water from natural resource. In other words, it is becoming common sense that there are a lot of correlations between the health and the quality of water which we drink every day. Today, even if the water that we drink or use does not contain any detrimental ingredient, the quality of water is not always satisfactory. It is becoming clear that the formation of water crystal reflects the quality of water.

### What does the crystal tell us?

The snow crystal has a beautiful hexagonal formation highly symmetric. The tap water gone through sterilization process by chlorine is likely to turn our more collapsed crystals and less evaluation mark than natural clean water. This may be partly explained by the influence of the chlorine residue materially.

Some researchers point out that there is a correlation between the formation of water crystal and its degree of water pollution and it can be one of the indexes of water quality in terms of the degree of pollution.

The water crystal formation reflects not only physical but informational or energetic aspect of the water.

Sample of water without treatment.

Sample of water treated by the Kalyxx Active device.

(Source: The Report of Water Crystal Experiment, Office Masaru Emoto, LLC, July 2022)

"The Good Brew Kombucha Company prides itself on using the highest quality organic ingredients and the best quality water. For the past 2 years we have been brewing kombucha using Daylesford Spring Water that has gone through Kalyxx device and have noticed heightened growth of our probiotic blend.

The complexity and microbial diversity of our living culture has been documented in a scientific paper (see <https://www.mdpi.com/2072-6643/13/12/4446>).

We believe that the Kalyxx device not only reduces scale and improves plant growth, it also enhances fermentation and the growth of probiotic bacteria and will continue to use it as a 'secret sauce' in our probiotic blends."

– Marc Cohen

## Activated / Structured Water

Structured water is a dynamic state of molecular bonding and information exchange. This type of water is beneficial for human life and is in harmony with nature. When one drinks and surrounds one's environment with healthy water, health continues to improve over time. Undoubtedly, this water has the fantastic ability to make unhealthy water, drained of life force, healthy and ready to drink again in a matter of moments. Information brought to any type of water, even spring water fresh from a mountain stream, is beneficial and yet improves the oxygenation and bioavailability of the water.

### What is structured water good for?

- Optimal Hydration
- Elimination Of Bacteria
- Enhanced Hygiene
- Gardening Benefits
- Wastewater Management

## Masaru Emoto

Whoever begins to uncover the secret of water will soon discover the name of Masaru Emoto. This Japanese doctor of alternative medicine told the world more about the secrets of water than anyone else. He undertook extensive research into water throughout the planet and studied it from the perspective of an original thinker. He proved that water is an important carrier of information. He managed to do this by photographing a microscopic particle of water – a small water crystal that changed its structure according to the action of various external factors.

Dr. Masaru Emoto (1943 – 2014) studied water for more than twenty years. With his knowledge and enthusiasm, he taught millions of people around the world to love clean water. He is the author of numerous books and a three-volume collection of photographs of beautiful water crystals. In addition to the scientific value that photographs have, they are also a sought-after work of art.

"There is no other substance in the world with which our well-being and health are so closely connected as with water." – Masaru Emoto

# KalyxX Active

The original water structuring vortex device  
creates unique water properties for limescale  
protection and water activation

**Reduction of scale formation in water systems with a confirmed efficiency of 90%.**

# IPS KalyxX Active

- Reduction of scale formation on water supply elements – confirmed efficiency of 90%.
- Antibacterial effect – blocks the multiplication of Escherichia Coli bacteria (thanks to silver electrodes).
- Water activation for optimal bioavailability.
- Patented technology TGP® – Turbulent Galvanic Polarization – no chemicals, no external energy.
- Suitable for cold (drinking) and hot water.
- NRL Certificate for direct permanent contact with drinking water.
- Environmentally friendly and chemical-free.
- No electricity required.
- Health safety product – each part of IPS is made from material suitable for contact with drinking water.
- Safe product – Verified Hydraulic Properties.

# IPS WashBall

**Effectively prevents corrosion  
and limescale creation**

- Protects appliances from limescale.
- Easy to use, no chemical softeners.
- No maintenance required.

- **LIMESCALE PROTECTION**
- **WATER SAVING**
- **HIGHER WASHING EFFICIENCY**
- **MONEY SAVING**
- **ENVIRONMENT FRIENDLY**

For using in:

- **WASHING MACHINES**
- **DISHWASHERS**
- **TOILET TANKS**

PATENT  
PROTECTED

# IPS WashBall

**IPS effectively prevents the formation of solid sediments and corrosion in cold and hot water appliances.**

**IPS WashBall** is a flow-through body with inside placed turbine-shaped electrodes of two different electrically conductive materials. The electrode design is patent-protected (TGP® - Turbulent Galvanic Polarization) and generates a swirling water flow, causing a change in the structure of the minerals.

Our patented technology **TGP®** (Turbulent Galvanic Polarization) used in **IPS WashBall** transforms limescale structures from **CALCITE** to **ARAGONITE**.  
The scale does not settle but washes away.

## Higher Washing Efficiency

It is proven with our internal tests and also by independent test (Clearview-USA) that washball has positive effects on Higher Washing Efficiency. During our test of Cotton /40 °C/60 ml washing gel we reach such a result.

- 100 % of tests were with the same or better results with using of WashBall.
- Average washing performance when using WashBall is 3,67% higher; highest efficiency achieved by black tea, the washing performance with WashBall was about 36,79% higher.
- If WashBall is used in standard washing, the effectiveness of the washing effect is usually increased (dependent on kind of contamination).
- The effect of using WashBall can be clearly recommended without negative side effects.

## Benchmark Results

IPS WashBall Results, December 10, 2019

## Amazon customer review

Client d'Amazon

★★★★★ Super produit

Commenté en France le 27 mai 2021

Achat vérifié

J ai une eau très dure.

Et les photo parle d elles même.

Je suis très écolo dans ma machine je ne mettais qu une lessive que je fais et du vinaigre ,mais ma machine etait toujours pleine de tartre.

En 3 machines avec la boule le resultat est vraiment visible.

Je suis tres satisfaite 😊😊😊😊😊

Water Saving

# OptimFlush System

The new revolutionary  
solution for toilet and flushing

- The most efficient flushing system.
- No need for a concealed cistern installation.
- Adjustable water quantity – 1.7 – 3.2 – 4 l.
- Quiet operation – low noise level of flushing.
- Higher water level – very easy to clean.
- Quick and easy installation.
- Tested for 200 000 cycles.
- CE certificated – comply with EN997.

Water  
saving

One piece solution  
- tank less

No external  
energy

Studio S Low Profile  
Studio S Toilet  
with OptimFlush  
System technology

OptimFlush creates a next generation of the toilet. Tank less toilet without external power supply, with extremely low water consumption fulfilling the strictest parameters of current technical standards and regulations with focus on maximum simplicity and reliability of the system.

"All In One" philosophy puts the greatest emphasis on fast and easy installation and building readiness. The top priority is the final appearance.

PATENT  
PROTECTED

# OptimFlush System

OptimFlush System is suitable for both types of flushing

- **syphonic**  
(mainly Asia and USA)
- **washdown**  
(mainly Europe and Middle East)

OFS is unique system how to flush toilet using pressure which is taken from the pipes.

The pressurized air with water is stored in the tanks inside toilet, ready to be released when needed.

The result is very efficient and silent flush, that can never be reached by using gravitation flushing (used in standard toilets in Europe).

Premiere of the Studio S toilet with OptimFlush technology at the KBIS 2020 trade fair in Las Vegas (USA).

Pictured from left: James Walsh (Marketing Director of American Standard), Mats Dannerstedt (SAT USA), Jaroslava Valová (founder of SIKO), Monika Vítová (CFO of the SIKO Group) and Ondřej Sochor (CEO of SAT).

# Wellness Shower

## with more features

Care for Health & Beauty

**2in1**

The Pedicure Shower is designed for the easy, safe and fast removal of hard skin on the feet. It can be done after every bath or shower and gently removed skin is immediately and cleanly washed away.

There is no need for an external source or mechanical power. Continuous rinsing with water provides gently care and the resulting effect. Combination with shower function provides the user with a more comprehensive 2 in 1 benefit.

Designed for  
**EASY, SAFE & FAST  
REMOVAL  
OF HARD SKIN**  
on the feet.

*Double-sided use 2in1*  
**Shower  
+ Pedicure Care**

• Rain • Massage • Rain / Massage

Pedicure Care

PATENT  
PROTECTED

# Pedicure Shower

## Functions

### Shower

Available four types of stone: rough, ordinary, medium and fine. Ordinary stone is included. Spare stones in the desired roughness can be purchased separately.

### Pedicure Care

Shower Function Switch

## Technical data

**Operating pressure:** min. 0,2 MPa / max. 0,6 MPa\*

**Recommended operating pressure:** 0,22 – 0,4 MPa\*

**Hot water temperature:** max. 60 °C

## Water consumption depending on pressure:

Europe version water pressure	Flow
20PSI (0.14 MPa)*	6.73 l/m
40 PSI (0.28 MPa)*	9.80 l/m
60 PSI (0.41 MPa)*	12.07 l/m
80 PSI (0.55 MPa)*	14.11 l/m

\*(1 MPa = 10 bars = 147 PSI)

Pedicure Shower  
SATWTSHS4 **29,66 €**

### NO EXTERNAL ENERGY

The device uses only  
the energy generated  
by the water flow.

Minimal operating pressure  
0,2 MPa (2 bars).

# Home Filter

**with transparent container  
for quick check of insert  
condition**

The filter is designed for connection to cold water and meets all requirements for effective filtration. Transparent body, allowing you to visually check the condition of the filter insert.

The head is fitted with brass 1" water inlet and outlet connections and a pressure relief valve to relieve pressure when the filter cartridge is replaced. O-ring for maximum impermeability.

Compatible with the vast majority of filter types on the market.

*Home filter is designed for domestic and commercial use.*

*Maximum  
operating pressure  
**8 bar***

*Minimum operating / Maximum working temperature  
**2 °C / 46 °C***

# Home Filter

## Specifications:

### Enameled steel

- combination of two natural substances - glass and steel
- steel is characterized by high strength and load capacity
- glass is decorated with great resistance to heat and chemical stress

 Soundproof variants of Vivien Silent + significantly reduce the noise of the bath during the bath.

 Sound insulation meets the strictest Swiss and German standards (SIA 181, DIN 4109 / A1).

Recommended to combine  
with bathtub screens (pages 94 - 97).

## Cast acrylate

### SURPRISINGLY LARGE INTERIOR

- Slim hems and a greater slope of the side walls give the bathtub a large interior space for a pleasant bath.

### COMFORTABLE AND SAFE SHOWERING

- The wide interior space, flat bottom and the addition of a bath screen guarantee a safe shower while standing.

### THE IDEAL SOLUTION FOR A SMALLER BATHROOMS

- The width of only 70 cm saves space in the bathroom, the shape of the bathtub allows it to be supplemented with any type of bathtub screen.

**Quality material** - Cast acrylate is used to make bathtubs. Products made of it retain their desired shape for a long time, they do not warp or crack. They have a high-gloss and non-porous surface that is easy to clean and has antibacterial properties.

Prices are without legs

# Folding shower door

## Possible combinations of shower doors

- A** combination of two doors SIKOSK \*\* + SIKOSK \*\* you get a square or a rectangle (eg 90x90, 100x80 etc)
- B** when using a door into a niche, a special profile is required SIKOPROFILSK + SIKOSK\*\*
- C** combination of shower doors and fixed walls SIKOSTENASK\*\* + SIKOSK\*\*

Easy installation – no screws and drilling profiles.

Adjustability 20 mm

Barrier-free entry

Softclose bidet seat  
SATBEASY2233 **115,40 €**

## Bidet seat

- Softclose
- Fits on most standard toilets
- Made from recyclable material
- Including SUS hose and T-connection

# Pre-wall installation system

## Application

- For mounting in front of a support wall or in to a plasterboard construction.
- For installation of wall-hung WC pans with a connecting pitch of 180 mm or 230 mm.
- For floor thickness 0–200 mm.
- For wall-hung WC.

## Features

- Dual flush independently adjustable with hygienic reserve
- Compatible with all SAT flush plates
- The construction of polystyrene insulation prevents condensation forming on the surface of the tank and dampens the vibrations from the tank into the building structure
- The frame allows the anchoring to a separate sufficiently strong plasterboard partition, in front of the bearing wall
- The service opening cover simplifies assembly and prevents the penetration of moisture and impurities
- Frame material: powder-coated metal
- Installation depth adjustable from 20–95 mm
- Suitable for installation of remote or sensor flushing
- Possibility of tilting the cistern for easy installation in wooden construction buildings or mobile cells
- The cistern is made of one piece, thus ensuring 100% impermeability
- The installed module is covered with a plasterboard panel and there is no need for any additional fixing or anchoring elements
- Adjustable anchor feet and a spring-lock system, with a range of 0–200 mm
- Dispenser for WC cistern tablets included
- Sliding rail holder for the waste connector can be set to eight positions between 0–93 mm
- Prepared for connecting a bracket with a DG 1/2" conversion for bidet seats and sprays
- Water supply from the rear/top
- Angle valve with the ability to connect to the Mepla piping system
- Maintenance work without using any tools
- Installation depth 125 mm
- Visible marks for both leveling and the centerline
- Cistern hinges made of two-component material insulate the transmission of vibrations from buildings
